SAP Information Sheet
SAP Rapid Deployment Solutions | SAP Rapid-Deployment Solution for Value Realization Management

Enabling Rapid Deployment for Value Realization Management with SAP® Solutions

The SAP rapid-deployment solution for value realization management gives you the tools you need to jump-start performance and better manage your initiatives – so you can employ your own value realization best practices and benchmarks in under 12 weeks.*

*The implementation timeline depends on the customer's requirements and specific situation.

Summary

The SAP® Strategy Management application helps to provide a clear link between operational processes and objectives, supporting your corporate strategy by helping your stakeholders to prioritize and focus resources appropriately. With its value management best practices and strategy templates, the rapid-deployment solution jump-starts key initiatives, so you can analyze and improve performance.

Business Challenges

- Quickly deliver value with your SAP Strategy Management application and control implementation risks
- Adopt best practices to better manage and communicate strategy; manage exceptions, interdependencies, and priorities; and analyze and improve performance
- Understand how business practices impact performance

Key Features

- **Prebuilt strategy templates** – Reduce implementation effort with strategic best practices and preconfigured content
- **Value realization** – Make content available in the SAP Strategy Management application to oversee the implementation of best practices, monitor the impact of budgeted initiatives on organizational goals and key performance indicators (KPIs), and improve business processes
- **Strategy management** – Document, manage, and monitor strategy to support project management of key initiatives, and integrate strategy with operational and financial planning
- **Benchmark data** – Measure and enable comparison of performance against peer organizations (using benchmarking survey results completed by your organization)
- **Scorecards** – Alert managers to problem areas, simplify root cause analysis, and use predefined KPIs for three scorecards based on one dimension

Business Benefits

- **Clearly link initiatives** to organizational goals and KPIs with simple summary views
- **Monitor the impact of strategic initiatives** on goals via status reports and updates
- **Drive accountability** across the organization with greater insight into the effect of initiatives
- **Allocate** budget appropriately by identifying the highest priority initiatives
