Regione Autonoma Sardegna: Centralizing Accounting and Improving Reports with SAP® Software

Regione Autonoma Sardegna has jurisdiction over 377 cities and serves close to 1.7 million people across 8 provinces. Keeping track of budget and cash flow is a complicated process that is made more so by fragmented IT systems. In order to quickly comply with new accounting regulations coming from the central government, the region chose financial management and HR solutions from SAP.

Accenture

BUSINESS TRANSFORMATION

The company's top objectives

- Comply with new regulatory reporting requirements
- Centralize fragmented accounting systems
- Reduce total cost of ownership

The resolution

- Determined SAP® solutions to be the best software for the organization's public procurement needs
- Implemented solutions for public sector, the SAP ERP Financials solution, and the SAP ERP Human Capital Management solution
- Engaged Accenture as the primary implementation partner
- Deployed a single team to train users across the organization
- Completed the implementation in nine months and within budget

The key benefits

- Online monitoring and fewer data access delays
- Automation of data transfer from agencies to the main office
- Better cash flow management
- Fewer IT systems requiring a smaller support staff and fewer user interfaces

"We are now using an accounting model that complies with federal public accounting requirements. SAP software is helping us to closely monitor expenses and guarantee transparency to our citizens."

Graziano Boi, Director of the Internal Control Management Office and SAP Project Manager, Regione Autonoma Sardegna
