Your Bridge to Fast, Efficient Procurement Operations

Does it seem like there's a gulf between where you are with procurement and where you need to be? SAP can help – with a rapid-deployment solution that integrates your on-premise SAP® Business Suite software with the cloud-based Ariba Network.

Your Bridge to...

Integration

Let SAP extend your on-premise solution with a leading business-to-business collaboration platform in the cloud. Drive bidirectional integration for your data and business processes across materials management and product catalogs.

Speed

In as little as **10 weeks**, integrate on-premise and cloud solutions from SAP and go live with the first wave of suppliers with our rapid-deployment solution.

Value

Get the most out of your existing SAP software investment by leveraging the data you already have. Drive better, more cost-effective collaboration with vendors and trading partners. Transform the way you interact with your partners – to increase efficiency, reduce costs, and help ensure the quality your customers expect.

Efficiency

Significant reduction in operating costs: Say goodbye to paper-based processes, and drive down the costs of on-boarding and managing partners. Streamline collaboration and automate key processes such as procure to pay and order to cash.

The Power of the Ariba Network

Tap into the world's largest trading platform and transform procurement to drive down costs, increase efficiency, and dramatically improve your competitive advantage:

- **1 million** connected companies*
- More than **40 million** purchase orders*
- **65 million** invoices processed annually*
- **$450 billion** annual transaction volume*

To learn more about how you can transform your procurement network, visit us online at www.sap.com/aribanetwork.
