GPT Group: Unifying Processes and Improving Visibility with SAP® ERP and an SAP-Qualified Rapid-Deployment Solution

GPT Group, made up of GPT Infraprojects Ltd., GPT Healthcare Ltd., and GPT Castings Ltd., supports construction projects across multiple sectors. To sustain growth and maintain oversight, it needed a single IT platform for all group companies. Working with Highbar Technologies, the group deployed the SAP® ERP application using an SAP-qualified rapid-deployment solution for engineering, construction, and operations. Now costs are down and productivity is on the rise.

BUSINESS TRANSFORMATION

The company's top objectives

- Improve operational visibility with a single IT platform unifying group companies
- Improve monitoring and control of inventory, purchases, and equipment with real-time reporting

The resolution

- Engaged Highbar Technologies to implement the SAP® ERP application using an SAP-qualified rapid-deployment solution for engineering, construction, and operations
- Completed rollout across two group companies in six months and within budget

The key benefits

- Integrated project management, logistics, and financial processes
- Increased productivity, accelerated process cycles, reduced inventory, improved equipment performance, and cut costs
- Automated authorizations for requisitions and purchase orders
- Improved waste control through online material reconciliation
- Enabled fast and automated reporting for remote projects

"With SAP ERP and the rapid-deployment solution, we were able to quickly unify all GPT Group companies on a single IT platform. This has significantly improved operational visibility across the group."

Jaya Verma, Assistant Vice President of IT, GPT Infraprojects Limited, Part of GPT Group

TOP BENEFITS ACHIEVED

30%
Faster financial close cycles

60%
Faster time to close accounts for inventory and materials
