

Secure Mobile Devices, Apps, and Content with Cloud-Based Management Solutions

The Best-Run Businesses Run SAP™

Quick Facts

Overview

Summary

Manage enterprise mobility simply and cost-effectively with cloud-based solutions from the SAP® Mobile Secure portfolio. Solutions include the SAP Afaria® mobile device management solution, the SAP Mobile App Protection solution by Mocana for mobile app security, and the SAP Mobile Documents solution for secure mobile content. This comprehensive offering gives you the power to manage your mobile workforce without the complexity and expense of an on-premise installation.

Objectives

- Holistically manage a broad range of mobile devices
- Securely provision and manage existing and future platforms
- Reliably extend security policies to personal devices
- Control costs

Solution

- Low-cost cloud platform with no up-front capital expenditure
- Over-the-air device provisioning and app delivery with comprehensive analytic reporting
- Mobile app wrapping for advanced security
- Mobile content management for secure access to business documents

Benefits

- Simplify device security, configuration, and management with a portfolio of cloud-based solutions
- Speed mobile adoption with rapid provisioning of infrastructure
- Eliminate up-front investment in infrastructure
- Enhance operational flexibility by scaling infrastructure to meet business demand in real time

For More Information

To learn more about SAP Mobile Secure, please visit www.sap.com/mobile/EMM.

Organizations that embrace enterprise mobility need to securely provision and manage Android, iOS, and Windows Phone 8 devices. The SAP Mobile Secure portfolio provides a low-cost, high-return approach for securing mobile devices, apps, and content. Requiring no upfront investment, this subscription-based offering helps businesses gain the benefits and robust features of on-premise mobile device management without the capital expense.

With the cloud edition of SAP Afaria, administrators can remotely provision and manage devices without touching them or interrupting users. An intuitive enrollment process helps users work safely with fully controlled, secure devices. Routine tasks, such as configuring devices and downloading corporate apps, are done via a self-service portal. Analytic dashboards and reports

offer immediate visibility into the mobile device population, helping IT managers take corrective action.

The cloud edition of SAP Mobile App Protection, a mobile app security solution, helps organizations accelerate mobile initiatives by rapidly enabling security features. Companies can add fine-grained usage and security policies to iOS and Android mobile apps without writing any code.

The cloud edition of SAP Mobile Documents offers mobile content management for enterprises that value collaboration, security, and control of business content. It provides anytime, anywhere access to data, helping users view personal and corporate content and collaborate in an intuitive native mobile app.
