

Attero: Growing Its Business to Save the Planet with SAP® Waste and Recycling and SAP BusinessObjects™ BI Solutions

Dutch waste-to-energy company Attero B.V. is helping solve one of the world's great environmental problems. Collecting about 3.4 million tons of waste a year, it repurposes recyclable materials and converts the rest into sustainable electricity for 350,000 households. But Attero needed to standardize processes and improve forecasting. With the SAP® Waste and Recycling application and SAP BusinessObjects™ business intelligence (BI) solutions, operations run better and visibility has increased.

BUSINESS TRANSFORMATION

The company's top objectives

- Streamline processes and improve oversight across all subsidiaries and lines of business
- Improve forecasting with more powerful analytics

The resolution

- Deployed the SAP® Waste and Recycling application and enabled the integration of SAP BusinessObjects™ business intelligence (BI) solutions with industry expert PROLOGA
- Managed project documentation within the SAP Solution Manager application management solution

The key benefits

- Established a standard, company-wide process for procurement
- Accelerated invoicing with a single, integrated weighing process
- Increased visibility, control, and scalability of operations, inventory, and material flow at the burning sites
- Enabled the benchmarking of subsidiary processes against the standard
- Fully integrated purchasing for transport and external facilitates

“SAP Waste and Recycling was the right solution to help us streamline operations and reduce costs. And SAP BusinessObjects BI is helping us plan better, thanks to more comprehensive business data.”

Arno Luisman, Financial Director, Attero B.V.

TOP BENEFITS ACHIEVED

10 weeks

To go live at 15 locations after initial rollout at one waste-to-energy facility

60%

Approximate reduction of maintenance effort and costs for weighing systems

80%

Approximate improvement in stock and inventory overview at all facilities

100%

Increase in procurement efficiency and overview by monitoring all orders in one system
