

SAP Solution Brief
SAP All-in-One

WORLD-CLASS BUSINESS PROCESS IMPROVEMENT WITH EASE

**See Your Business Operate on SAP® Software –
in Just Two Weeks**

SAP makes it easy for you to realize the benefits of the world's best software with SAP® All-in-One packages. These packages for small and midsize enterprises reduce the effort, cost, time, and complexity associated with implementing a world-class business management solution. Leveraging more than 30 years of experience, SAP and its partners deliver a world-class solution in weeks – providing immediate and sustainable benefits at minimal cost and risk on a platform that your business will never outgrow.

As your business grows, it's important for your business management software to support and improve your business processes. SAP meets this need with SAP® All-in-One packages. SAP All-in-One packages leverage the experience of SAP Solution Center organizations and SAP partners to reduce dramatically the effort, cost, time, and complexity associated with selecting and implementing a complete business management solution. A “day in the life” demonstration at your site or ours, using your business data, will enable you to see instantly how SAP software can improve your principal business processes.

Packaged Pricing, Premium Performance

SAP All-in-One packages minimize cost and maximize value by delivering preengineered support for business processes, comprehensive solution design and process documentation, data migration tools, and project accelerators. You can leverage SAP's experience working with small and midsize enterprises in more than 25 industries to evaluate and implement a business management solution faster at lower cost and risk. SAP All-in-One packages, which are based on the world-class mySAP™ Business Suite family of business applications, enable you to address core business processes immediately with unlimited capacity to add functionality as your business needs change and grow.

From Zero to Operational in Less Than Three Months

Our approach streamlines the evaluation process so you can make a decision quickly and get up and running in a short time. Within two weeks of providing a subset of data representing your business processes, you'll see your business operating on the SAP application. You'll be able to walk through key day-to-day business processes developed for organizations of your size, in your industry.

This day-in-the-life demo serves as the foundation for the conference-room pilot, where your key business users can experience the solution hands-on – with your data in your environment. With the subsequent implementation, you'll be fully operational and on your way to improved efficiency and decision making in three months or less. These defined-scope implementations, sold, deployed, and supported by SAP and its partners, use proven practices for a safe and predictable project, delivered on time and within budget.
