

FACILITATING PROJECT SUCCESS WITH SAP® SOLUTION REVIEW

INDEPENDENT, STATE-OF-THE-ART ASSESSMENT TO SECURE PROJECT SUCCESS

SAP® Solution Review services let you draw on the experience and expertise of SAP Consulting to help you succeed with your SAP software implementation. We work with you to assess key project health indicators that can determine the project's ultimate success and clear recommendations on the steps to take.

Your company has high expectations and little room for failure. How can you ensure that your efforts to deploy SAP® solutions are successful? By turning to the SAP Consulting organization and its SAP Solution Review services, independent project assessment services that take advantage of the experience that SAP has gained from tens of thousands of company projects.

Project managers and consultants from SAP Consulting work closely with you to ensure that your implementation project is on the path to success. The services involve two sessions of standardized yet interactive interviews between key project stakeholders and senior SAP consultants. After each session, SAP Consulting summarizes its findings in a written report that it then discusses with you. The report delivers clear recommendations on what to continue doing, what to stop doing, and, if necessary, what to change.

Design Review

The first SAP Solution Review, called the design review, takes place at the end of the business blueprint phase of your implementation project. It examines the business process design that's captured in the blueprint documents, the project organization structure, issues, gaps, and developments and then discusses issues with the project team.

Configuration Review

The second review, called the configuration review, takes place during the realization phase of your

implementation project, after basic configuration is complete and integration testing has started.

Deliverables

Immediately after each review, the reviewing team will present an initial report to your sponsor and team members. This will include a brief description of all the findings and recommendations of the reviewers. About a week later, SAP will deliver to you a comprehensive final report that documents all the findings and recommendations in detail.

A Collaboration Leading to Success

SAP Solution Review can be either embedded in your SAP services contract up front or introduced subsequently as an add-on service. Either way, it provides you with a powerful accelerator to project success: you stay in control of your projects while leveraging the experience that SAP Consulting has gained from tens of thousands of implementations.

The bottom line: SAP Solution Review enables you to ensure project results that are on time and within budget by making the most of the experience and expertise of SAP Consulting. You can avoid escalation costs through proactive, standardized evaluations at critical moments throughout the implementation process. The end result is a greater likelihood of a successful implementation, lower total implementation costs, and higher satisfaction.

Summary

Using SAP® Solution Review services, the SAP Consulting organization works with you to assess key project health indicators and ensure your implementation project's ultimate success. You gain clear, actionable recommendations on what is working and what you need to change, which leads to greater likelihood of a successful implementation, lower total implementation costs, and higher satisfaction.

Challenges

- Ensure that implementation project remains on schedule
- Control total cost of ownership

Supported Business Processes and Software Functions

- Project review after both design and configuration by experienced and knowledgeable SAP consultants
- Comprehensive report with review and detailed recommendations

Business Benefits

- Ensures project results are on time and within budget
- Leads to lower total implementation costs and higher overall satisfaction through proactive standardized evaluations during the implementation process
