mySAP™ TECHNOLOGY

THE BEST-RUN E-BUSINESSES RUN SAP

mySAP™ TECHNOLOGY IS OPEN, FOR BUSINESS

No person, no department is an island. Every individual, every department, and every company is part of a larger value chain that includes coworkers, customers, suppliers – even competitors. That’s why the mySAP.com® e-business platform is built for the new realities of collaborative commerce. Each solution is designed to work seamlessly with all other mySAP.com solutions and those of third-party providers. Organizations around the world can benefit from new levels of efficiency, productivity, and profitability – because mySAP.com e-business solutions are open, for business.

As part of the mySAP.com e-business platform, mySAP™ Technology brings this open approach to the management of your company’s IT landscape, providing the tools, practices, and expertise you need to manage heterogeneous systems in today’s collaborative world.

THE IDEAL PLATFORM FOR YOUR E-BUSINESS GOALS

The rise of new technologies like the Internet has altered the competitive landscape. Companies are seeking ways to use these technologies to coordinate and improve business processes both within and beyond the enterprise, as well as critical relationships with customers and partners. SAP's answer to these challenges is mySAP Technology, a native Web infrastructure that is based on open standards and designed for reliable, mission-critical e-business solutions.

To integrate their internal SAP and non-SAP systems, as well as to integrate their systems with those of their partners, suppliers, and customers, companies need to evolve their IT landscape, adopting a new breed of architecture based on open integration. With mySAP Technology, SAP solves the integration challenge from a business perspective. mySAP Technology enables new types of innovative, flexible, and easily adjustable business scenarios across internal and external SAP and non-SAP components, while providing the reliability and low cost of ownership that customers expect from SAP solutions.

mySAP Technology extends proven SAP integration to third-party applications and business process across many different applications – with the same SAP flexibility – and it expands proven SAP reliability and high performance to integrated processes. SAP ensures the lowest possible cost of ownership with one common infrastructure for all solutions that combines reliability, business process expertise, and open integration.

AN E-BUSINESS ARCHITECTURE FOR YOUR COMPANY

With mySAP Technology, you can face the future with confidence.

Drawing on SAP's decades of experience and built with the latest open integration technologies, mySAP Technology takes a holistic approach to managing heterogeneous business systems. It avoids the pitfalls and hidden costs of piecemeal solutions, and that means you profit from a host of benefits:

- **Open integration:** mySAP Technology integrates and combines all your e-business applications for the ultimate in efficiency and ease, and it does so in an evolutionary fashion. It's the key to harnessing the seamless, collaborative processes of e-business.
- **Seamless collaboration:** Using innovative Web services technology, mySAP Technology connects people around the globe so all of your employees, partners, suppliers, and customers can participate in flexible, collaborative processes regardless of technical or geographic boundaries.
- **Openness:** mySAP Technology works with all open technology platforms – including the leading hardware, operating systems, databases, communications protocols, middleware standards, and programming languages – so you can integrate disparate systems and flexibly extend your solution as your needs change.
- **Ease of change:** mySAP Technology makes it easy to add new components, enhance existing functions, or incorporate new technologies.
- **One infrastructure:** mySAP Technology provides powerful integration capabilities that enable the value-added combination of information, application services, and process knowledge.
- **Security:** Complete e-business security mechanisms ensure data protection and confidentiality. By supporting all common security standards, mySAP Technology is prepared to meet your needs for authorization, authentication, and the secure exchange of information.

- **Reliability and scalability:** mySAP Technology provides proven flexibility and scalability for all industries and companies of all sizes. Advanced system management tools and superior services ensure a low cost of ownership, high performance, and reliability around the clock.
- **Globalization:** mySAP Technology supports multiple languages, multiple currencies, multiple time zones, translation tools, and country-specific features so you can participate fully in today's global markets.
- **Mobility:** mySAP Technology supports Web-based access and mobile devices, extending the reach of your systems.
- **Smooth implementation:** mySAP Technology is designed for easy implementation, giving you a head start on your competition.
- **Customization:** With mySAP Technology, you can tailor your mySAP.com solutions to meet the specific requirements of your geography, your country, your industry, and your company.

KEY CAPABILITIES OF mySAP TECHNOLOGY
