

Atech: Enabling a Next-Level Data Centricity Strategy for Better and Faster Decision-Making

Atech, an Embraer Group company, embeds the features of technological development, innovation, and creativity in its DNA. Its history begins in 1981 with the nationalization of Brazilian air traffic control and defense technology. In 2013, Embraer acquired Atech to broaden its portfolio and business development capabilities for military and defense technologies. Over the years, Atech's operations resulted in robust business growth, prompting the company to review and transform its data strategy so it could realize its internationalization ambitions.

The company needed to resolve data redundancies, simplify a complex landscape, and streamline operational tasks that often required considerable efforts. To address these business issues, Atech needed a digital foundation that could **enable next-level data centricity**, process excellence, and integration with Embraer systems.

THE BEST RUN

Leveraging Strategic Data for More-Informed Decision-Making with **SAP S/4HANA® Cloud**

Before: Challenges and Opportunities

- Highly customized and complex landscape impacting the consistency and availability of data across the company and limiting timely decision-making and actions
- Opportunity to enhance organizational productivity by automating operational tasks that require rework

Why SAP

- Integrated and intelligent architecture built on SAP S/4HANA® Cloud, reducing IT complexity and enabling consistent, transparent, and error-free data with comprehensive visibility and reporting
- SAP HANA® Enterprise Cloud for the management of application upgrades, backup support, and infrastructure as a service

After: Value-Driven Results

- Comprehensive transparency with a unified system creating a single source of truth for reliable data, increasing productivity and compliance across the organization
- A future-ready platform to support innovation
- Key user autonomy and empowerment to facilitate timely decisions and actions based on reliable data and information
- Empowerment of the IT team to play a strategic role in business outcomes

“SAP S/4HANA Cloud empowered the entire organization to manage data under the concept of a **single source of truth**, helping ensure promptness for decision-making.”

THE BEST RUN

Evolving the IT Department into an Enabler of Business Strategy

Atech, an Embraer Group company, carries in its DNA the features of technological development, innovation, and creativity. Over the years, Atech's operations resulted in robust business growth that demanded Atech review its data strategy.

In this context, the main challenges to overcome for better and faster decision-making were data redundancies, simplifying a complex landscape, and operational tasks requiring considerable effort. To address these business issues, Atech envisioned a digital foundation that would create next-level data centricity and process excellence with a clear product road map.

Atech decided to implement an integrated and intelligent architecture built on SAP S/4HANA® Cloud, reducing IT complexity and enabling consistent, transparent data with comprehensive visibility and reporting. Next-generation processes are enabling the IT department to play a strategic role in business outcomes. Atech also takes advantage of SAP HANA® Enterprise Cloud to manage application upgrades, support backups, and benefit from infrastructure as a service.

“My main objective is to transform the IT department into an enabler of our strategy, creating a **game-changing role inside our organization**. If there are no complaints about IT, it means we are doing a great job.”
