The SQL Anywhere In-Memory Edition for RAP Program contains or is provided with component software products from both Sybase and third parties. Except as otherwise specifically authorized below, use of all components is limited to use in the same manner and capacity for which the Program as a whole is licensed. Additional functionality may be included in this Program, however, you are only authorized to use the specific functionality made available to you upon installation of the Program or by use of any license keys provided to you by Sybase and not any other functionality accessed by overriding the license management mechanism within the Program. Additional licenses may be available from Sybase for a fee.

1. Sample Code. The Program contains or is provided with Sample Code. Sample Code is provided AS IS, without warranty or liability of any kind. You may use, reproduce, modify and distribute the Sample Code that is provided without limitation, on the condition that you retain the copyright notice and disclaimer as to the original Sybase code.

2. Use of Programs. Although the Program media may include versions of SQL Anywhere server and client components for several different operating systems, you may install only one such version for each licensed copy of SQL Anywhere. Each such copy of the SQL Anywhere DBMS multi-user server for a single operating system may be installed on a single Machine installation. You may access the SQL Anywhere RAP Client Edition server components from an unlimited number of Seats, and may include internal users within the Customer's organization, and external users outside of the Customers organization accessing the Program via the Internet ("Internet Users"), provided that (a) Internet Users may not Use the Program to develop or modify applications or perform other programming tasks, and may only Use the Program in conjunction with Customer's applications; (b) the server component of SQL Anywhere is installed on only one (1) Machine, running no more than 1 CPU; and (c) all of the Seats accessing the server component of SQL Anywhere are at all times connected via the network to the server and do not access the server via synchronization or other non-networked means. You may also install the SQL Anywhere Client Software on these networked Seats. You may add additional CPUs or Machines to the CPU License by purchasing additional CPU or Machine licenses. For SQL Anywhere In-Memory Edition For RAP, CPU shall mean the number of Processors or Cores on a Machine. For SQL Anywhere In-Memory Edition For RAP only, this CPU License description supersedes any definition or terms of use for CPU licenses stated in the Software License Agreement, Exhibit A or Purchase Order. YOU MAY NOT USE THE SQL ANYWHERE PERSONAL SERVER, MOBILINK, QANYWHERE, OR ULTRALITE WITHOUT THE PURCHASE OF ADDITIONAL LICENSES.

SQL Anywhere Client Software: The SQL Anywhere Client Software includes the SQL Anywhere database interface files, Interactive SQL, Sybase Central, the SQL Anywhere Console Utility, and the SQL Anywhere database utilities as described in the SQL Anywhere Documentation.

Diagnostic Tracing: When using the Application Profiling feature in SQL Anywhere, you have the option of storing tracing data within the database being profiled or in a separate tracing database stored on a separate Machine. You may install the SQL Anywhere server components on a separate Machine solely for use with the tracing database used in conjunction with the Application Profiling feature. No other

components may be installed on the separate Machine, and the SQL Anywhere server may not be used to process other applications, without obtaining an additional license.
