

PRODUCT SPECIFIC LICENSE TERMS
Sybase® IQ v12.6
(“Program”)

IN ADDITION TO THE LICENSE TERMS SET OUT IN THE SYBASE LICENSE AGREEMENT, THE FOLLOWING ADDITIONAL OR DIFFERENT RIGHTS AND ACCOMPANYING OBLIGATIONS AND RESTRICTIONS SHALL APPLY TO THE PROGRAM:

The Program may contain or be provided with component software products from both Sybase and third parties. Except as set forth below, use of all components is limited to use in the same manner and capacity for which the Program as a whole is licensed. Additional licenses for Sybase components may be available from Sybase for a fee.

I. Sybase Restricted Use Components. The Program contains or is provided with the Restricted Use Components identified below. You are licensed without further charge to Use only one (1) copy of each Restricted Use Component on one (1) Machine. You may Use the Restricted Use Components solely in conjunction with your use of the Program, and subject to any Additional Restrictions set forth below.

Restricted Use Components	Additional Restrictions
Software Developer’s Kit	May only be used to support internal functions of the Program. Software Developer’s Kit may not be used for development or any other purpose.

II. Free Download Components. The Program, including the Developer Component, may include certain third party open source and other free download components (“Free Download Components”). You may have additional rights in the Free Download Components that are provided by the third party licensors of those components. The Free Download Components and any such third party licenses and third party-required notices for the Program are identified at <http://www.sybase.com/thirdpartylegal> (third party licenses and notices for Free Download Components included as part of the Developer Component are identified under the name of that product). Any obligations undertaken by Sybase in the Agreement relating to the Free Download Components as part of the Program are provided by Sybase alone, and not by the third party licensors of the Free Download Components. **A. FURTHER DISCLAIMER OF WARRANTIES AND LIABILITIES.** The Free Download Components are provided “AS IS” by the third party licensors, who disclaim all liabilities, damages (even if they have been advised of the possibility of such damages), warranties, indemnities and other obligations of any kind, express or implied, with regard to the Free Download Components. Nothing in the foregoing affects any performance warranty provided by Sybase with regard to the Program as a whole. **B. DISCLAIMER OF INDEMNITIES.** The Free Download Components are excluded from any indemnity provided by Sybase or its subsidiaries in the Agreement.

III. Limitations on Use for Single Application Server Edition of the Program. The Single Application Server Edition of the Program (“Single Application Server Edition”) is licensed for installation and use on no more than two (2) networked Machines, and each Machine shall be limited to a maximum of sixteen (16) CPUs. The license fees payable by you for the Single Application Server Edition shall be determined by calculating the total number of CPUs on which the Single Application Server Edition is licensed to run. The Single Application Server Edition may be used to manage up to twenty-five (25) tables across a maximum of one hundred (100) columns. For example, the Single Application Server Edition environment may manage (i) twenty-five tables with four (4) columns each or (ii) four (4) tables with twenty-five (25) columns each. You may not use the Single Application Server Edition in excess of the licensed Machine or table/column capacity without first paying additional license fees therefor. Any license fees paid for the Single Application Server Edition may be applied to a license credit towards an update to an unrestricted Sybase IQ license.

IV. Options

Terms Applicable to the Large Objects Management Option (“LOB Option”) for the Program. If you purchase a license for the LOB Option, the license type and quantity of CPUs you license must correspond to the license type and number of CPUs for which the Program has been licensed.
