

Three Ways SAP Signavio Streamlined MTF Biologics' Business Processes via **Improved Visibility and Collaboration**

Since 1987, global non-profit organization MTF Biologics has saved and healed lives by providing safe, high-quality allografts from donated human tissues for orthopedic, wound care and plastic and reconstructive surgery. As innovators, MTF Biologics advanced the science of transplantation by supporting research within its own organization and amid clinicians and researchers worldwide. As advances emerged, MTF Biologics needed new processes. SAP Signavio allowed the organization to streamline its tools and gain total control and visibility of business process mapping, all with real-time data.

24

Hours needed for SAP Signavio to uncover the main causes of MTF's inefficiencies for process in scope, previously weeks

47%

Improvement of operational performance

5

Different departments' processes mapped out to create end-to-end process view in just eight hours
